Half Time Announcement

2017 Fisher High School Hall of Fame

William L. Shields

FHS Class of 1979

The Fisher High School, the Fisher Alumni Association, and the Fisher Community Foundation are pleased to honor our 2017 Fisher High School Hall of Fame recipient from the Class of 1979, William L. Shields.

William is a 1979 graduate of Fisher High School and the son of Wayne and Grace Shields. After graduation, he attended Southern Illinois University and earned his associate's degree in aviation electronics technology. Beginning as an avionics technician, Bill steadily worked his way from the hands on technical work to the engineering and certification aspects of aircraft modifications. During this growth, Bill held engineering and leadership positions for several industry organizations including Rockwell Collins, Gulfstream, Hawker Beechcraft and more. After nearly 25 years of experience under his belt, Bill founded his own consulting company, 3S Certification. 3S Certification was delegated by the Federal Aviation Administration (FAA) as an Organization Designation Authorization (ODA) and granted approval authority for the certification requirements of modifications to all types of civilian aircraft. With a natural entrepreneurial spirit, he grew 3S, as well as several other subsidiary companies, becoming a leader in the aviation industry. Most recently, Bill has been focusing on the certification of innovative aircraft technologies related to reducing fuel consumption during airline operations. In 2013, Bill, and his wife, Stacey, started a grass-finished beef operation in Bois D'Arc, Mo., where they currently live. Bill and Stacey have one daughter, Peyson, who resides in Kansas City, Mo.

Bill will be seated in the press box during the game for classmates, friends, and family who wish to visit with him.
